SUBJECT Parts for Opel Cars Being Shipped to Moscow

DIST. 22 April 1947

25X1A

PAGES

25X1X

SUPPLEMENT

25X1A

The foundry of the Schumann & Co. plant in Leipzig, which is under Russian administration, furnishes cast parts of light metal for the chassis and body of the Opel 1.3 liter car which is being built in Moscow. [redacted] comment: The 1.3 liter refers to the piston displacement of the car.) All parts are shipped to Moscow. Source believes this can be considered proof that the dismantled plant section of the Opel Werke in Russelsheim was not reconstructed in Leipzig in the Opel branch plant of Edmund Becker and Co. A.G., but rather in Moscow.
